PRICE LIST

OF

Henderson's Native Flowering and Medicinal Plants

A WORD TO THE PROSPECTIVE CUSTOMER

In the purchasing of native flowering and medicinal plants one cannot safely exercise the simple procedure that is followed in the purchasing of dry goods or groceries. In the case of goods from the store, one may see them, feel them, and, in short, examine them until entirely satisfied that the goods in hand are the ones that are wanted. Again, if you purchase goods from a mail order house and it happens that they are not exactly what you wished, you are, nevertheless, but little inconvenienced in exchanging them, or it may be that they will "answer the purpose." But when you purchase nursery stock you want exactly what you order. A substitute will not "answer the purpose." As you cannot, usually, examine the stock personally you have to rely on the integrity of the man that you are buying from. Here is where you may exercise caution. Select a nurseryman who knows plants, who has them, and who will supply you with what you want, or, if he has exhausted his supply of the item requested, will refund every cent of your money.

When you order Ginseng, you want Ginseng and not Turkey Pea (*Erigenia bulbosa*), a plant that rather closely resembles Ginseng. In the case of ornamental plants (many plants in the following list are both ornamental and medicinal) you want exactly what you order be-

cause that certain plant will fit the site you have for it as no other plant can. In ornamental planting every plant has its place. The purchaser may have space for just a few choice plants, plants that he may not even know but because he has heard them praised he desires some for himself. In the event an unscrupulous nurseryman sells him other than that ordered he loses both time and money because a year or more may pass before he can be sure that he has been defrauded. So, first, select a man who knows plants. Occasionally a nurseryman inadvertently tricks his customers through ignorance of the correct names of the plants that he professes to know. Therefore, be careful to select a man who will supply the plants you call for.

Why have I written the foregoing? Why! Precisely because I am going to introduce you to a nurseryman who adheres strictly to the square deal policy that is advocated in the paragraph above. That man is myself, Henderson, a name that since 1908 has meant much to the grower of native flowers and medicinal plants, a name that for over twenty years has been synonymous with quality plants. Many of you who read this list have handled my nursery stock but to the many who have not, to the many who hesitate to purchase native and medicinal plants that they have wanted for years, I would say—try Henderson. Why? Because you will get what you order or your money will be refunded. Moreover, any one desiring to select from the following list those plants most suitable for decorative planting will find me entirely willing to co-operate. From several years experience I have learned what the majority desire in the way of native plants for rock gardens, pool and bog sites, etc., so for the convenience of those desiring such plants I have appended a list of those most suitable for each location. Any information, cultural instructions, etc., requested, is given free. Large orders are insured; I pay the transportation charges in the U. S., and a certificate of inspection accompanies all orders. No orders filled in winter or mid-summer but I advise inquirers to query as early as possible prior to the season that they may wish to order.

Let me repeat, if you have hesitated about buying native flowering or medicinal plants you need hesitate no longer. Duplicate my prices—if you can—but give me a trial and let me convince you that I have quality in addition to rock-bottom prices—and remember that you get exactly what you call for!

I am often in a position to furnish seed of some of the plants listed in dozen, 100, and 1,000 lots, but this is the exception rather than the rule. However, I supply seed only of the following list of plants. Orders for seed should be placed in winter or early spring for later delivery. All seed are fresh, none are held over, therefore, if the crop is short, the supply will be limited. Order early!

I can also supply seed of a number of species of dicidious trees. Inquire about any that you may have in mind.

Write for prices on 1, 2, and 3 year old Ginseng plants and seed; also, first and second grade Golden Seal plants and seed.

I hope to offer you more new and interesting plants each season. Meanwhile, permit me to supply you with the old reliables, flowering and medicinal plants that have stood the test of time and that you know are hard to equal. Plants are guaranteed to reach you in number one condition and you may rely on full count.

Remit by money order or check. Certainly, checks are acceptable. I shall always believe that those who love the out-of-doors are few and far between among the many who swerve from the straight and narrow.

Thanks for the interest shown by your present inquiry. One order will convince you of the truth of all that I have said. May I have your order?
